

Jorge Otero

Fullstack Engineer · Python Backend & AI Integrations

Buenos Aires, Argentina · jorgotero4@gmail.com · [linkedin.com/in/jorgeotero1998](https://www.linkedin.com/in/jorgeotero1998) · github.com/Jorgeotero1998
portfolio-mu-lac.vercel.app

Full Stack Developer with a strong backend focus in Python, building production REST APIs, automation engines, and AI-integrated pipelines. I work daily with LLM APIs (Groq/Llama 3.3), have contributed JWT/RBAC auth and WebSocket dashboards to open-source FastAPI projects, and use AI-assisted dev tools (Cursor, Claude Code) as part of my regular workflow. Available immediately for hybrid/remote roles in CABA.

EXPERIENCE

Fullstack Developer — Team Project | [4Geeks Academy](#) · Jun 2025 – Present

- ❑ Led backend architecture of LaVerde Tienda, a production e-commerce app (React + Flask + PostgreSQL), currently live.
- ❑ Designed SQLAlchemy models, JWT auth, Cloudinary integration, Flask-Migrate, and a 44-test pytest suite.
- ❑ Set up GitHub Actions CI/CD pipeline and devcontainer for team consistency; deployed on Render.
- ❑ Discussed Flask vs FastAPI architecture decisions openly with the team — documented in project discussions.

Independent Python Developer | [Freelance](#) · [Self-Employed](#) · Nov 2023 – Present

- ❑ Built REST APIs and automation pipelines integrating third-party services: Groq LLM, VirusTotal, Telegram Bot API, Cloudinary.
- ❑ Developed AI Task Orchestrator: LLM-powered goal decomposition platform (Flask + Groq/Llama 3.3 + React + Docker).
- ❑ Built web scraping pipelines with Selenium and Playwright; deployed apps with Docker Compose on Render and Vercel.
- ❑ Contributed to open-source FastAPI project (ai-audit-shelf): JWT/RBAC auth, WebSocket real-time dashboard, FTS5 full-text search.

PROJECTS

AI Task Orchestrator — *Python · Flask · Groq API (Llama 3.3) · React · Vite · SQLite · Docker* [📁 repo](#)

- ❑ Full-stack app that decomposes a high-level goal into actionable subtasks using an LLM inference pipeline.
- ❑ Flask backend + SQLAlchemy persistence, React/Vite frontend, fully containerized. Includes PDF export and task history dashboard.

ai-audit-shelf (Open Source Contribution) — *FastAPI · SQLite · WebSockets · JWT/RBAC* [📁 repo](#)

- ❑ PRs #22 (WebSocket live dashboard), #23 (JWT/RBAC authentication), #24 (FTS5 full-text search) merged upstream.
- ❑ Worked directly in a FastAPI + SQLite codebase — closest production exposure to a DRF-style API pattern.

LaVerde Tienda — Full Stack E-Commerce (Live) — *React · Flask · PostgreSQL · JWT · Cloudinary · GitHub Actions* [📁 repo](#)

- ❑ Production platform with 44 automated pytest tests, JWT auth, admin panel, Cloudinary images, and full deployment pipeline.

Globe Pulse — 3D Data Visualization — *React Three Fiber · Three.js · NASA textures* [📁 repo](#)

- ❑ Interactive navigable 3D globe with pulsing demographic nodes and animated flow arcs. Live on Vercel.

SKILLS

Languages: Python · JavaScript · TypeScript · Bash · C++

Backend: Flask · FastAPI · REST APIs · SQLAlchemy · JWT/RBAC · Werkzeug · pytest

Frontend: React · Vite · TypeScript · HTML/CSS · Bootstrap · Three.js / React Three Fiber

Databases: PostgreSQL · SQLite

DevOps: Docker · Docker Compose · GitHub Actions · Render · Vercel · Linux

AI / LLMs: Groq API (Llama 3.3) · LLM pipelines · RAG concepts · WebSocket integrations

AI Dev Tools: Cursor · Claude Code · AI-assisted development

Other APIs: VirusTotal · Telegram Bot API · Cloudinary · Selenium · Playwright

EDUCATION

Full Stack Development · 4Geeks Academy · Jan 2026 – Present

CERTIFICATIONS

- ❑ AWS Certified Security Specialty — Amazon Web Services
- ❑ Azure AZ-500 Security Engineer — Microsoft
- ❑ Google Cloud Cybersecurity — Google
- ❑ Automate Cybersecurity with Python — Google (Oct 2025)
- ❑ Python — Verified by Talently (May 2026)
- ❑ JavaScript — Verified by Talently (May 2026)
- ❑ Cloud-Native Development with OpenShift & Kubernetes — Red Hat
